

CATHAYCOLOR™ Fast Yellow 150

Cathaycolor™ Fast Yellow 150 is an Azo Nickel Complex versatile pigment widely used in coatings, plastics, and paper applications where durability and consistency are critical, bridging the gap between organic pigment brightness and inorganic pigment durability. It delivers long-term color performance across multiple systems, making it a reliable solution for manufacturers demanding consistency, longevity, and visual impact.

Key benefits

- **Clean, transparent yellow shade with high chroma.**
- **Superior Lightfastness and Weather Resistance**
- **Thermal Stability - withstands high processing temperatures**
- **High tinting strength**

Applications

- **Automotive coatings, industrial finishes, and decorative paints. Its durability and lightfastness make it a preferred choice for high-performance exterior coatings and metallic or effect systems.**
- **Excellent dispersion, low migration, and thermal stability up to 300°C, making it compatible with polycarbonate, polystyrene, polyolefins, and engineering polymers.**
- **Uniform coloration, good dispersibility, and resistance to bleeding, making it suitable for decor papers and laminates.**
